

Press release

With HYPOXI® on your dream trip in the luxury resort!

Wals-Siezenheim, August 2017

In the period April to May 2017 all participants of the HYPOXI® campaign "Beach Body" automatically entered in the raffle for a dream trip for 2 at the 5-Star-Deluxe-Resort VILA VITA PARC, Algarve! On June, 12th the winner was determined under lawyers supervision by lot.

The happy winner is Mrs. Monika Kirves from Bochum. Mrs. Kirves feels optimally cared by the team of the HYPOXI®-Studio Mülheim a. d. Ruhr and moreover she is pleased by her excellent results with the HYPOXI-Method®.

Mrs. Kirves was immensely happy when she was informed about being the lucky winner for the trip to the luxury resort "VILA VITA PARC", in Portugal. She will enjoy the journey together with her husband.

VILA VITA Parc Resort & Spa in the Algarve (Portugal) is widely considered one of Europe's finest resorts.

Set in over 22 hectares of lush landscaped sub-tropical gardens overlooking the Atlantic Ocean, this unique resort has an extensive choice of leisure facilities and a variety of first class culinary options.

The chefs of up to 10 seasonal restaurants delight all with the variety of creative Portuguese and international specialities, including the two Michelin-starred Ocean Restaurant.

design your body

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
