HYPOXI® enters luxurious hospitality market in China mainland

Wals-Siezenheim, September 2017

After years of preparation and planning we are delighted to announce the first opening of a HYPOXI®-Studio in a prestigious international 5* Star hotel in China – the **Grand Hyatt in Shenzhen**.

This is one of many already confirmed and intriguing HYPOXI® expansions in China for this year.

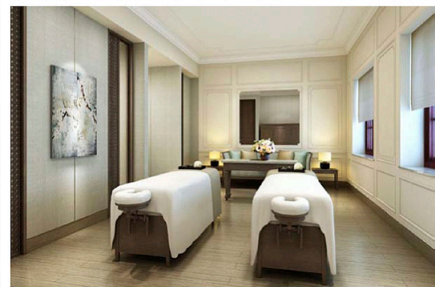

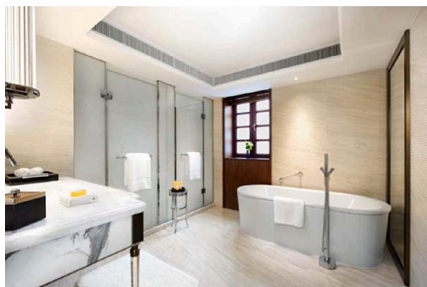

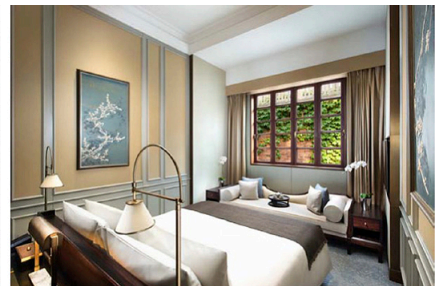

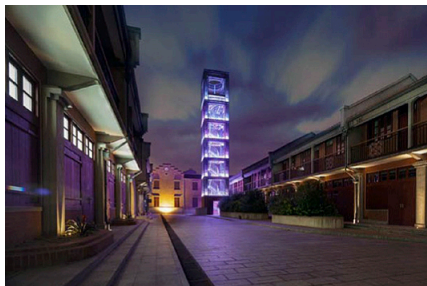

In Asia – especially in China Mainland – the trusted luxurious hospitality sector with its 5* hotels and developments is not only hosting a large number of the most renowned and decorated restaurants but at the same time – with its upper spa and fitness facilities – the trusted hotel brands are also the market and innovation leaders in the field of recreation and well-being. "Thus, it was just a logical step to have the HYPOXI-Method® incorporated in such developments", says Mr. Daniel Ridders the Managing Director of HYPOXI® China.

design your body

The next opening is already being prepared and will take place at the brand-new and ultra-luxurious **CAPELLA Jian Ye Li Hotel in Shanghai**.

Within the industry and beyond the Singapore based Capella Group is renowned for its state of the art recreational facilities which are now equipped with the HYPOXI-Method® for targeted, all-natural and safe body sculpting.

As also in China customer satisfaction is HYPOXI's utmost concern, HYPOXI® China is now working hard to train and educate all the hotel's staff to make them familiar with the unique HYPOXI-Method® to achieve great results with our customers in the Far East, adds Ms. Julia Lohmann the MD and Head of Training & Education of HYPOXI® China.

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

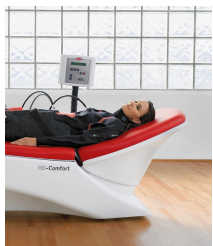

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
