

## Press release

### **HYPOXI® expansion in IRAN continues**

Wals-Siezenheim, September 2017

With the third opening of the exclusive HYPOXI®-Studio at the Modern Elahyue Complex in Teheran HYPOXI® Iran continues with the next step of a well prepared and planned market expansion.

"Finally, upon strong request from our satisfied and happy clients in our 2 existing locations, we have opened our third HYPOXI®-Studio in a luxurious area in Tehran at the Modern Elahyue Complex" says Mrs. Golnar Mohsenzadeh, General Manager of HYPOXI® Iran.

The opening attracted many guests from the beauty, nutrition and media scene and the uniqueness of the HYPOXI-Method® combined with its great success in body shaping was highly appreciated. Further expansion in Teheran is the logical step to fulfil the growing demand for the HYPOXI® brand in Iran and more HYPOXI®-Studios are going to be opened soon.

## The HYPOXI® devices at a glance:

### **HYPOXI-Trainer® S120**

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

### **HYPOXI-Trainer® L250**

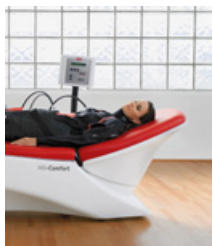

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

### **HYPOXI-Vacunaut®**

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

### **HYPOXI® HD-Comfort**

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
