Press release

A new HYPOXI® location in Bonn

Wals-Siezenheim, August 2018

Dr. med. Marwan Elmasry opened his HYPOXI®-Studio in Germany's former capital Bonn. The exclusively equipped studio is run by Mrs. Elmasry together with her sisters.

Since the beginning of this year, Dr. Elmasry had been searching for a figure concept that has a lasting effect. Being a medical himself, besides the unique effect of the HYPOXI-Method® and the best possible quality, it was also important for him to have an international partner at his side with HYPOXI®. After an intensive search, especially via the franchise portal www.franchiseportal.de, and conscientious research in the body shaping market, he decided together with his wife to go for HYPOXI®.

Good news for all body-minded people in Bonn, and of course for those suffering with lipoedema, who are under medical supervision by Dr. Elmasry.

design your body

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut® is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in the HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
