

Press release

HYPOXI[®] is pleased about a new location in Basel, Switzerland

Wals-Siezenheim, February 2018

On 27th January 2018 Mrs. Eveline Thüler opened her own HYPOXI[®]-Studio in Basel, Spalenring. Mrs. Thüler has come to know the HYPOXI-Method[®] being a HYPOXI[®]-Coach herself and loved it. Working with her satisfied customers brought about the decision that a self-employment in the sector of targeted figure forming would be exactly the right thing for her.

At the new HYPOXI[®]-Studio in Basel, Spalenring, Mrs. Thüler and her team will not only offer the classic HYPOXI[®] Intensive Care Programs but the HYPOXI-Training[®] for those affected by lipoedema.

The unique mechanism of the HYPOXI-Method[®] can sustainably increase the quality of life of those affected by lipoedema.

Results of the HYPOXI[®]-Lipoedema study:

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers. During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
