HYPOXI[®] is pleased about a new location in Helsinki, Finland

Wals-Siezenheim, January 2019

On January, 1st, 2019 Mrs. Kristiina Leskinen opened her own HYPOXI[®]-Studio in the trendy new residential and business area of Jätkäsaari in Helsinki. It is the 26th studio in Finland and 6th studio in the Capital region of Helsinki (and surroundings).

Mrs. Leskinen has come to know the HYPOXI-Method[®] being a HYPOXI[®]-Coach herself and loved it. Her dream was to open her own studio and now she has fulfilled her dream. Kristiina Leskinen has got a Masters Degree in Business and is also a qualified Personal Trainer and Nutritional Coach.

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers. During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
