Press release

A new HYPOXI® location at lake Zicksee in Austria.

Wals-Siezenheim, August 2020

Once again, HYPOXI® is drawn to the lakes. Anna Summer opens her HYPOXI®-Studio in St. Andrä am Zicksee.

Ms. Summer is a trained beautician and successful HYPOXI® customer who has come to know and love the HYPOXI-Method®. The desire to change her career quickly gave her the idea of opening her own HYPOXI®-Studio. The studio has a very pleasant atmosphere, in which women and men are very welcome.

Ms. Summer was trained by our Master-Trainer Yvonne Koch. In addition to the classic HYPOXI® figure shaping, Ms. Summer would also like to devote herself to women who suffer from Lipoedema. Apart from training as an HYPOXI®-Coach, she has completed the training on the HYPOXI-Method® accompanying measures for Lipoedema sufferers.

We are happy that the HYPOXI-Method® is now offered in St. Andrä am Zicksee and we wish Anna Summer every success.

Anna Summer

design your body

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
