

## Press release

### **A new HYPOXI® location in Darmstadt, Germany**

Straß im Attergau, October 2021

### **Targeted figure shaping and cosmetics in a sophisticated ambience**

The HYPOXI®-Studio Darmstadt has been open on the premises of HUNCA cosmetics since September 25th, 2021.

Master-Trainer Yvonne Koch trained Ayse Hunca, owner of the studio, and her team to offer the classic HYPOXI® intensive and maintenance programs.

In addition to the targeted figure shaping with the HYPOXI-Method®, there is the possibility to take advantage of the broad and proven range of HUNCA cosmetics.

Face and body treatments, for example, hydra facial, anti-ageing, micro needling, permanent makeup, microblading, permanent hair removal, waxing, and much more, can be used in a high-quality ambience.

In addition, the entire program is supplemented by an EMS training system of the latest generation.

We are happy that the HYPOXI-Method® is now offered in Darmstadt, and we wish Ayse Hunca every success.

## The HYPOXI® devices at a glance:

### HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

### HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

### HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

### HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
