

## Press release

### **HYPOXI® on board the cruise ship AIDAprera**

Straß im Attergau, June 2022

On 14 May 2022, AIDAprera completed a three-week shipyard stay in Rotterdam and set off for Hamburg. On 16 May 2022, the first guests boarded in the Hanseatic city to discover numerous innovations on board on their trip to Norway.

In addition to the technical updates and the scheduled class and maintenance work, AIDAprera received a visual beauty treatment.

In the new ice bar, guests of all ages feast on the tastiest ice creams. The ice cream masters are surprised with delicious ice cream creations from their own production and a large selection of cakes.

The Body & Soul Organic Spa also shines in new splendour. New onboard is an HYPOXI-Studio for figure-shaping, and as a supplement to the extensive fitness offer, there are also Cyberobics workouts with international star trainers.

A particular fashion accessories area for leather goods, handbags and sunglasses has been integrated into the shopping plaza, offering guests even greater shopping pleasure on their travels.

In the 2022 summer season, AIDAprera will embark on 10-day voyages to Norway from Hamburg.

## The HYPOXI® devices at a glance:

### HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

### HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

### HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

### HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
