

Press release

HYPOXI® is pleased to announce a new Distribution partner in Middle East and Turkiye

Straß im Attergau, October 2022

Bessam Yildirim was born in 1960 and graduated from Bogazici University with a degree in Business Administration and Management. He successfully worked as an HYPOXI® distributor for about eight years in UAE / GCC / Middle East under the Finex Spa Solutions LLC established in Dubai in 2008. Although he had to leave for Turkey in 2016, he enthusiastically took back on, the distributorship in UAE / GCC / Middle East and Turkey region in the early months of 2022 to contribute to its development as it is a brand that he believes in and trusts. This time under Interlink Business Services FZCO, a company he has owned for over two decades. His last team returns with the same enthusiasm and support as in the past.

The aim is never to sell devices but to provide the necessary support by pledging a concept, ensuring its sustainability, following the results one-to-one, and keeping the protection of its partners/clientele in the foreground. Growth will continue as we sell a concept and create customer experiences by creating sustainable systems.

Our team includes Maila De La Luna Merana as Business Manager, Juliane Knips as Trainer of the GCC /Middle East region and Asuman Helvacioğlu as consuler.

The HYPOXI® devices at a glance:

HYPOXI-Trainer® S120

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

HYPOXI-Trainer® L250

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

HYPOXI-Vacunaut®

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

HYPOXI® HD-Comfort

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
