### **HYPOXI® now in Luxembourg: Welcome to our new partners**

Straß im Attergau, May 2025

We are proud to welcome our new partners in Luxembourg, Bernadett Bujaki and Zoltan Schuszter. With the opening of their new HYPOXI®-Studio in Mamer, the scientifically proven HYPOXI-Method® is now available to clients in Luxembourg for the very first time.

Their beautifully equipped studio reflects the high standards and passion they bring to their work.

During our recent training session at our Training centre in Wildenhag, Austria and visits to their new studio, we've had the opportunity to get to know Bernadett and Zoltan better, and we are confident that they will represent the HYPOXI® brand with professionalism, dedication, and enthusiasm.

With this exciting step, HYPOXI® continues to grow its international presence – helping more people achieve their body-shaping goals in a natural and targeted way.

We wish them great success and look forward to a strong partnership!

## The HYPOXI® devices at a glance:

### **HYPOXI-Trainer® S120**

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

### **HYPOXI-Trainer® L250**

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

### **HYPOXI-Vacunaut®**

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

### **HYPOXI® HD-Comfort**

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
