

## Press release

### **HYPOXI® Golf Trophy 2025**

Straß im Attergau, May 2025

#### **"The Spirit of Golf and Community"**

– this was the guiding motto of the 2nd edition of the HYPOXI® Golf Trophy, held on 24 May 2025 at the picturesque Pfarrkirchen im Mühlkreis Golf Club.

In glorious golfing weather, 55 participants teed off in pursuit of the day's top honours.

Among the competitors was none other than former ski jumping world champion and current coach of the German women's national ski jumping team, Heinz Kuttin. He showcased his skills alongside Prof. Heribert Sendlhofer and HYPOXI® shareholder Bernd Eckerstorfer in a spirited flight.

However, it was Barbara Wolfmaier and Michael Engleder who ultimately stole the spotlight, securing an impressive victory.

Following the award ceremony, where winners across three categories and a special prize were celebrated, the day's competitive edge gave way to relaxed camaraderie. Guests were treated to an exceptional dinner prepared by chef Doris

Aichbauer and her team, who delivered a memorable culinary experience in the clubhouse. The event concluded with a warm and lively evening gathering – the perfect end to a truly fantastic day of sport, friendship, and celebration.

## The HYPOXI® devices at a glance:

### **HYPOXI-Trainer® S120**

The S120 combines the three components of HYPOXI-Method® effectively: The computer-controlled alternation of high and low pressure takes place in a chamber that reaches up to the hips. The gentle exercise takes place sitting on the integrated bicycle ergometer. This puts the problem areas – hip, underbelly, buttocks and legs - under pressure, facilitates the activity of the veins and eliminates fat in a targeted manner.

### **HYPOXI-Trainer® L250**

The L250 permits the alternating application of low-pressure for the underbelly, hip, behind and legs. The comfortable reclined position relieves the body of most of its weight during training and promotes the elimination of liquids and toxins. The results are beautiful, slender legs and a visible reduction of cellulite.

### **HYPOXI-Vacunaut®**

The Vacunaut is used to reduce the girth of the stomach and hips. Training is performed in the HYPOXI®-PressureSuit with an integrated network of 122 high and low pressure chambers.

During moderate exercise - which can take place on a treadmill, exercise bicycle or other popular cardiovascular exercise equipment - the application of high and low pressure targets the abdomen and hips.

### **HYPOXI® HD-Comfort**

In order to remain firm and strong the skin needs special treatments. 400 active vacuum chambers integrated in the problem areas in HYPOXI® HD-PressureSuit ensure that the skin gets the exercise it needs. A comfortable lounge chair with integrated high and low-pressure technology ensures pleasant relaxation while the elastic connective fibres of the skin work diligently to achieve smooth, firm skin.
